Zappiti One 4K HDR / HDD slot up to 16 TB

Insert 3.5" SATA HDD (up to 16 TB pre formatted HDD) into the HDD "hotswap" slot to get amazing storage capacity! (HDD not included).

Zappiti Mini 4K HDR

With its ultra-compact size and mounting options, the Zappiti Mini 4K HDR can be hung at the back of your TV. Additionally, thanks to its IR extender system you can easily control the device, even when installed in a cabinet.

Zappiti 4K HDR

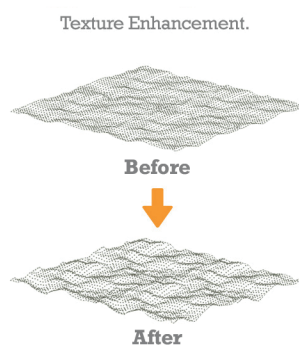

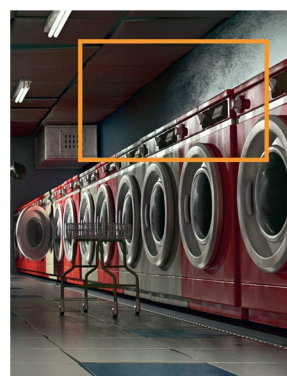

Supporting almost all video and audio formats, codecs and file containers, including all modern video standards such as HDMI 2.0a, Ultra HD 4K, HDR, and 4K60p, the Zappiti 4K HDR media player range sets an entirely new standard.

The best movie watching experience ever.

The Zappiti 4K HDR media players are compatible with most audio and video formats such as HEVC video codec with one billion colors (10-Bit color encoding) ISO Blu-ray, M2TS, MKV 4K, MVC 3D with 3D subtitles, home theater audio (including Dolby Atmos and DTS:X), high-resolution audio up to 32-Bit/192 kHz, and offers Wi-Fi 5G and Ethernet gigabit network capability. This new player range is also compatible with Zappiti Media Center; providing the best possible home theater experience.

Zappiti MagicPixel v2.

Forget expensive outboard video processors... with Zappiti, you're living the video dream! The Zappiti 4K HDR media players incorporate Zappiti MagicPixel v2 technology, which offers outstanding picture quality - far better than the previous generations - with improved dynamics, accuracy colorimetry, more contrast, solid deinterlacing and better upscaling (up to 4K resolution). Even on a Full HD 1080p TV or a front projector, you will be astounded by the improved image of your display! 3D also offers greater image depth and an impressive, immersive effect.

Ultra HD 4K.

Zappiti 4K HDR media players feature HDMI 2.0a output to provide the best compatibility with latest 4K video content such as 4K60p or HDR. Zappiti MagicPixel v2 can also upscale your HD video content up to UHD (3840x2160) into 4x times Full HD! The high-quality upgrade dramatically improves video image quality. If you don't own an Ultra HD 4K display, Zappiti "4K Full HD" technology converts 4K video content into extremely high-quality uncompressed video output to enjoy 4K content on Full HD displays. This process increases the resolution by about 30% compared with Blu-ray on a Full HD TV.

Zappiti Media Center.

Zappiti Media Center is an entertainment hub available on the Zappiti media players featuring an impressive user interface with movie covers. With Zappiti Media Center V4, you can experience your entire movie and TV series collection, browse and play your titles from local and network storage media, resume playback from the last playback position, read information about the cast and other details about the show, download subtitles, play trailers and much more, on your tv, through your Zappiti media player.

Parental Control.

With the parental control feature, you can designate movies as "children's" and block access to other movies with a PIN code. Thus, your children can safely access only their movies! In addition, the child mode provides direct access to movies without the synopsis for greater ease of use.

Sagas.

Sagas films are automatically placed in groups and sorted by release date. A saga cover dedicated to the collection is associated with the group and movies are displayed in a stunning carousel with great 3D motion effects!

Zappiti Trailers.

Thanks to Zappiti Trailer you can watch the trailer of your movies directly from the Zappiti GUI on your tablet or your TV through your Zappiti player.

Zappiti Sub.

With Zappiti Sub function, you can easily download the subtitles of a movie or TV show episode directly from Zappiti Media Center.

Zappiti Search.

Zappiti Media Center V4 feature a new search engine and a mix of filters and sorting. You can quickly find your favorite shows and movies by using sorting filters such as "most recent", "rating" and "seen".

Tablet, Mac/PC, NAS.

In addition to the Zappiti 4K HDR player connected to your TV, you can manage your video library from your tablet, smartphone or computer (Mac/PC). And instead of Zappiti Server Cloud, you can install Zappiti Server on your computer (PC/Mac) or your NAS (Synology, Asustor). You can benefit from a true multi-room video system and enjoy all your video collections from everywhere. In fact, when you add a new movie, it will automatically be added to all of your devices.
